Akhil Mishra
(Sr Frontend Developer)

Work Experience

AirBnb - Payout team(via Altimetrik India Private Limited) | Frontend Developer   Oct'23 - Present

● Successfully integrated features for the admin transaction page, improving tracking and reporting efficiency along with that reduced the bundle size of the codebase, resulting in a 3x improvement in page load speed. This led to a 50% increase in data accuracy and a 40% reduction in reporting time.
● Designed a custom report generator and personalized earnings cards, enabling hosts to track earnings and payouts. Projected to boost host engagement by 15% and increase annual booking revenue by $2 million.
● Led the development of key features (Custom Reports and Earnings Type Filtering), enhancing reporting configurability and payout traceability, resulting in a 30% decrease in customer service inquiries (~30k fewer) and an estimated $500k savings in operational costs.
● Enhanced application performance and accessibility by implementing frontend best practices, optimizing existing features, and improving overall code quality.
● Participated in the Airbnb Hackathon 2024 and developed the "Ask AI Anything" (AAA) project, which was ranked among the top 10 out of 100+ entries and earned a finalist position.

Radarr Technologies (Acquired) | Senior Frontend Developer   May'21 – Aug'23

● Successfully integrated multiple modules and features into the platform, enhancing our revenue by 200% .
● Engineered the transformation of the core product into a Single Page Application (SPA), reducing load time by 50% and significantly improving performance.
● Consistently recognized for delivering 95% of projects on time, building and managing teams of up to 5 developers, and mentoring software development organizations to improve efficiency by 30%..
● Initiated performance tuning techniques at the application and database levels, handling large data volumes and improving processing speed by 40%.
● Identified and mitigated risks associated with the technical architecture, implementation and deployment.
● Designed diverse dashboards for data visualization, featuring over 100 chart types using HighchartsJS.
● Developed reusable components such as custom modals, dropdowns, checkboxes, and date filters using React, Redux, NextJS, and SCSS, enhancing modularity and consistency across the application..
● Led the migration of the Stripe Payment Gateway within the product.

Jivox India | Associate Software Developer   Dec'19 – Apr'21

● Constructed an internal platform ads resource link using JSON and React JS, serving as a centralized repository for all ads prepared by Jivox. This platform significantly contributed to increasing our sales by $0.5M
● Enhance campaign creatives to elevate user experience and achieve a substantial surge in serving by 90-95%.
● Conducted training sessions for customers on ad utilization and customization for future applications.
● Developed a Countdown Timer component for the Jivox platform, enhancing platform efficiency.
